

Diving masks

Tusa M28 Geminus

CE 89/686
EN250 [dive equipment]

The Tusa M28 Geminus is a low profile, low volume mask. The light but sturdy composite frame gives an enhanced grip and shock protection. A special designed skirt and head strap give extra comfort and a maximum soft fit. This good sealing mask is available in several colors with clear transparent silicone or black silicone skirts (M28GB). Suited for Proteye **Clear C™** corrective lenses.

Diving masks

Tusa M212 Ceos

CE 89/696
EN250 [dive equipment]

The Tusa M212 Ceos is a low profile, small volume mask due to its special frame construction. Its lightweight frame and wide view, together with the use of the Freedom Technology, makes this a comfortable mask to wear. Available in several frame colors, including a black silicone skirt (M212GB). Suitable for Proteye **Clear C^{cm} corrective lenses**.
